

June 2016

Dear Pleasant Valley Water Company Member

We are pleased to furnish you with the following information about the water quality and services we provide to our members.

Pleasant Valley Water Company purchases our water from the City of Tillamook as a finished product. The City does all of the filtration and treatment. PVWC collects monthly samples for Coliform Bacteria levels, yearly samples for Disinfection By-Products and Lead & Copper samples every 3 years. Enclosed is the 2015 Annual Water Quality Report from the Tillamook Water Department containing contaminant test results and other important information regarding your drinking water.

Water delivery to our Company enters the system from one tap point on the City's mainline at Clemens Corner Road and is pumped into our system by two alternating pumps at the Clemens Corner Pump Station. The system is backed up by an 185,000 gallon reservoir on Fawcett Creek Road, which gravity feeds back into the system.

Oregon Drinking Water Services has identified criteria for determining whether a community public water system should be considered to have outstanding performance. This designation is given at the completion of a water system survey (formerly referred to as a sanitary survey). A water system survey is an on-site review of a system's sources, treatment, storage facilities, distribution system, operation and maintenance procedures, monitoring, and management, for the purpose of evaluating the system's capability of providing safe water to the public. Systems that are designated outstanding performers will have their water system survey frequency reduced from every 3 years to every 5 years. We are happy to inform you that your PVWC water system has been named an outstanding performer with the completion of our last survey.

Our Lead & Copper samples are on a three year cycle and were done in 2013. There were no significant amounts of Lead or Copper in the 10 samples tested. These will be due again in 2016.

We invite you to attend our quarterly board meetings, held the fourth Wed. of the first month of each quarter, in the Carl Rawe Meeting Room at Tillamook PUD, 1115 Pacific Ave. in Tillamook. Meetings are at 7:00 pm.

Your Board Members Are:

Todd Johnson, President	815-8306	Bill Porter, Board Member	842-8039
Terry Jones, Sec/Treas	842-5508	John Putman, Board Member	842-7109
Leroy Satter, Board Member	842-5607	Mark Hopkins, Board Member	842-5215

Amy Braden, Bookkeeper	842-8352	Ken/Nonda Zwald, Operators	842-1515
------------------------	----------	----------------------------	----------

Sincerely,

Pleasant Valley Water Company
Board of Directors

TEST RESULTS						
Contaminant	Violation Y/N	Level Detected	Unit Measurement	MCLG	MCL	Likely Source of Contamination
Inorganic Contaminants						
Copper Aug 2013	N	0.0980	ppm (parts per million)	1.3	Action Level 1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
Lead Aug 2013	N	.000	ppb (parts per billion)	ND	Action Level 15	Corrosion of household plumbing systems, erosion of natural deposits
