

West Hills Water Company
PWS# 41-00895

Dear West Hills Water Company Consumer,

We are pleased to furnish you with the following information about the water quality and services we provide to our members.

West Hills Water Co. purchases our water from the City of Tillamook as a finished product. The City does all the filtration and treatment. WHWC collects monthly samples for Coliform Bacteria levels, yearly samples for Disinfection By-Products and Lead & Copper samples every 3 years. Enclosed is the 2022 Annual Water Quality Report from the Tillamook Water Department containing contaminant test results and other important information regarding your drinking water.

Water delivery to the Company enters our system from one tap point, located near the Third St. Bridge south of the Tillamook Regional Medical Center.

Oregon Drinking Water Services has identified criteria for determining whether a community public water system should be considered to have outstanding performance. This designation is given at the completion of a water system survey (formerly referred to as a sanitary survey). A water system survey is an on-site review of a system's sources, treatment, storage facilities, distribution system, operation and maintenance procedures, monitoring, and management, for the purpose of evaluating the system's capability of providing safe water to the public. Systems that are designated outstanding performers will have their water system survey frequency reduced from every 3 years to every 5 years. We are happy to inform you that your WHWC water system has been named an outstanding performer with the completion of our last survey.

Our Lead and Copper sampling is on a three-year cycle and they were done in 2022. There were no significant amounts of Lead or Copper in the 10 samples tested. These will be due again in 2025.

Our Water System Operator is:

Clyde Wagner

842-1515

Our bookkeeper is:

Amy Braden

812-1660

Sincerely,

West Hills Water Company

TEST RESULTS**

Contaminant	Violation Y/N	Level Detected	Unit Measurement	MCLG	MCL	Likely Source of Contamination
Inorganic Contaminants						
Copper Aug 2022	N	0.0560	ppm (parts per million)	1.3	Action Level 1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
Lead Aug 2022	N	0.0030	ppb (parts per billion)	ND	Action Level 15	Corrosion of household plumbing systems, erosion of natural deposits
Disinfection Byproducts						
Trihalomethanes (TTHM) July 2022		0.0074	ppm		.080	Disinfection Byproducts, Byproduct Precursors, Disinfection Residuals
Haloacetic Acids (HAA5) July 2022		0.0037	ppm		.060	Disinfection Byproducts, Byproduct Precursors, Disinfection Residuals
Microbiological Contaminants						
Total Coliform Bacteria	N	None detected in 2022	present/ not present	0	0	Breaks in pipe, pipeline replacement construction
Fecal Coliform	N			0	0
